

SYSTEM ARCHITECTURE

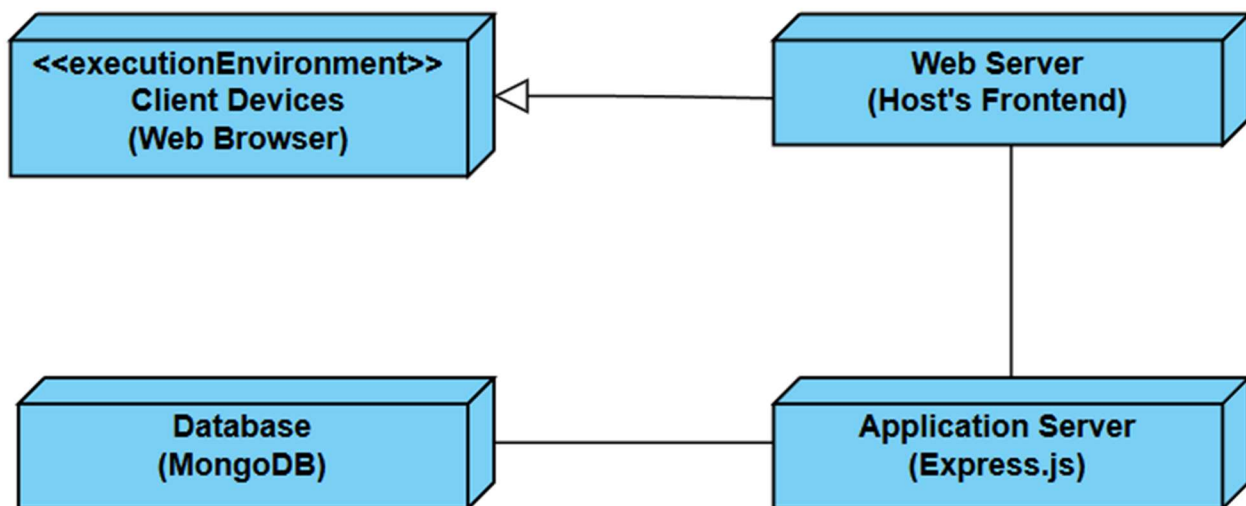

22i-0760 Talha Ahmad

22i-0873 Ibrahim Shahid

22i-1180 Omer Mustafa

Identifying Subsystems

Below is the UML Package Diagram

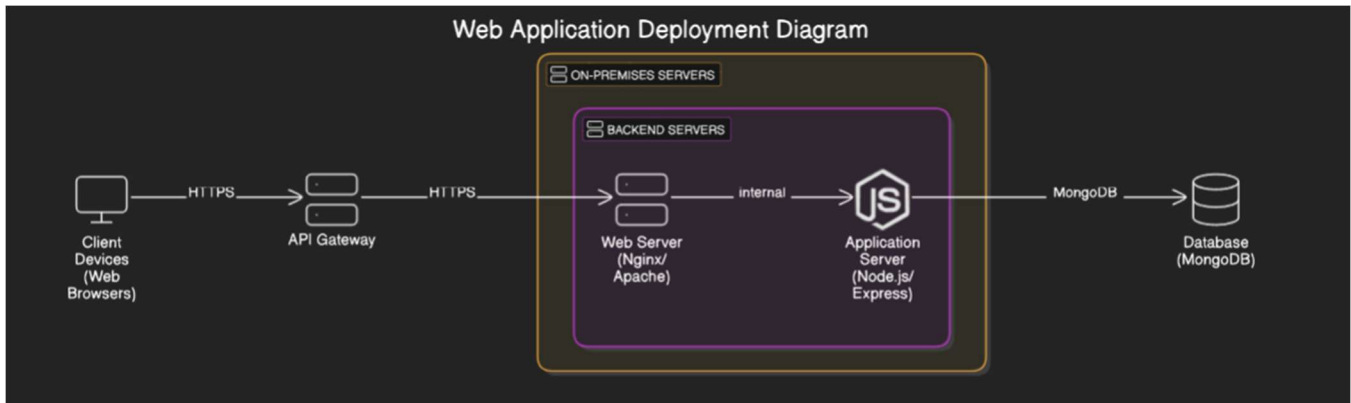

Identifying Subsystems

- **Client-Server Architecture:** The frontend (client) communicates with the backend (server) via RESTful API calls.
- **Layered Architecture:** The application is structured in layers (presentation, business logic, data access) to separate concerns.

Deployment Diagram for Client Deployments

Below is the Deployment Diagram
